

Warhammer 40,000

Decision Tree: Can I Shoot This Target?

Visibility • Engagement • Range • Cover • Hidden

This tree assumes your unit is already eligible to shoot this turn. It determines whether a specific target can be selected for a weapon.

Visibility

A target is **visible** if you can draw a straight line between your model and it, without an intervening **obscuring** terrain area (or a **Solid** enclosed gap 3" or less from ground level) blocking it.

Engagement

A model is **engaged** as soon as an enemy model is within its **engagement range** (2" horizontally and 5" vertically). An engaged target cannot normally be selected for a shooting attack.

1 Is the target visible? *

Yes

No

Cannot shoot

2 Is the target engaged?

Yes

No

Cannot shoot **

3 Is the target within range of the weapon?

Yes

No

Can shoot *

Cannot shoot

Cover

If every model in the target is within a terrain area (and has the **INFANTRY/BEASTS/SWARM** keyword), or is not fully visible due to an intervening terrain feature, that unit has the **benefit of cover**.

Worsen the **BS** characteristic of that attack by 1.

Hidden

A model with the **INFANTRY/BEASTS/SWARM** keyword within a terrain area that contains dense terrain features is **hidden**, provided its unit did not make ranged attacks this turn or the previous turn. It is then only visible to enemy models within **15"**.

This is evaluated **model by model**: if even one model in the unit is visible (e.g. out in the open), the whole unit can be targeted normally, even beyond 15".

Gone to Ground: if it is also **not fully visible** to the attacker due to an intervening **dense** terrain feature, it has gone to ground: its detection range drops to **12"** (instead of 15") against that attack.

Obscuring Terrain

A terrain area containing one or more **light** or **dense** terrain features is an **obscuring terrain area**. If **every** line of sight between two models crosses such an area (excluding areas either model is within), they are **not visible** to each other.

* If the target is **Hidden** (see box), it is only visible within 15" (or 12" if it has gone to ground). If the shot is possible, the **benefit of cover** (see box) may also apply and worsen the attack's BS characteristic.

** Exception: if your unit is itself engaged with this target, it can still shoot at it using Close-quarters shooting.

Warhammer 40,000

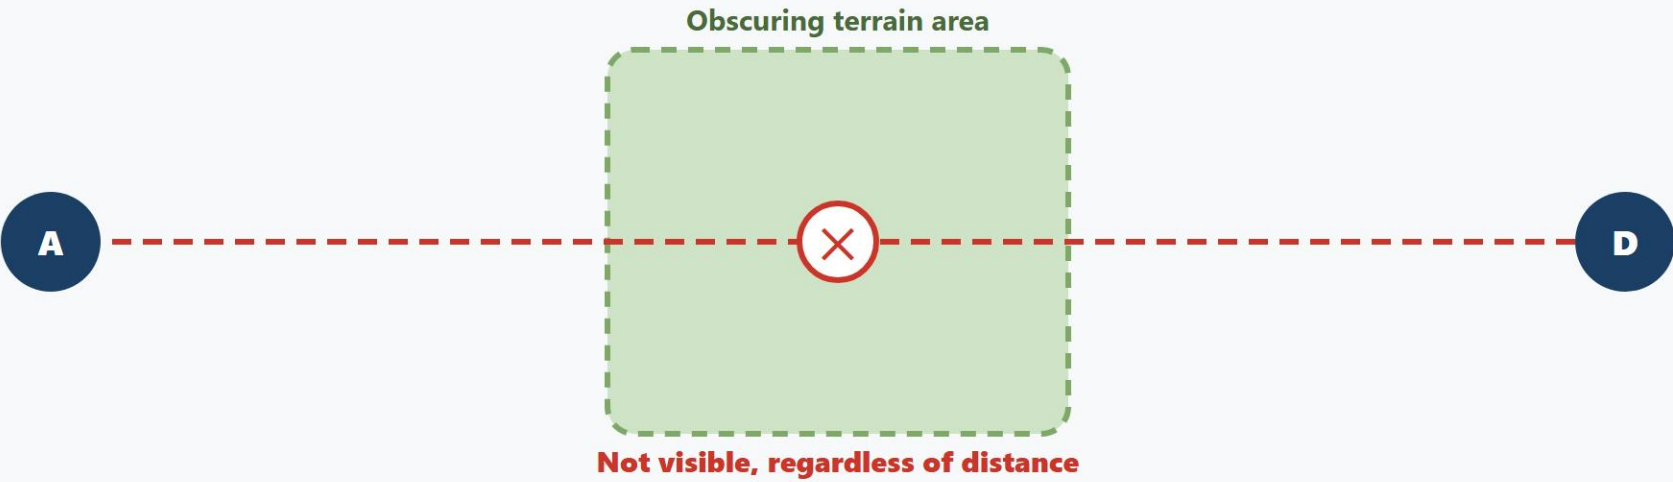

Visibility: Obscuring Terrain & Hidden

Terrain Area • Line of Sight • Detection Range

Three cases that block (or reduce) visibility of a model, as a companion to the "Can I Shoot This Target?" tree.

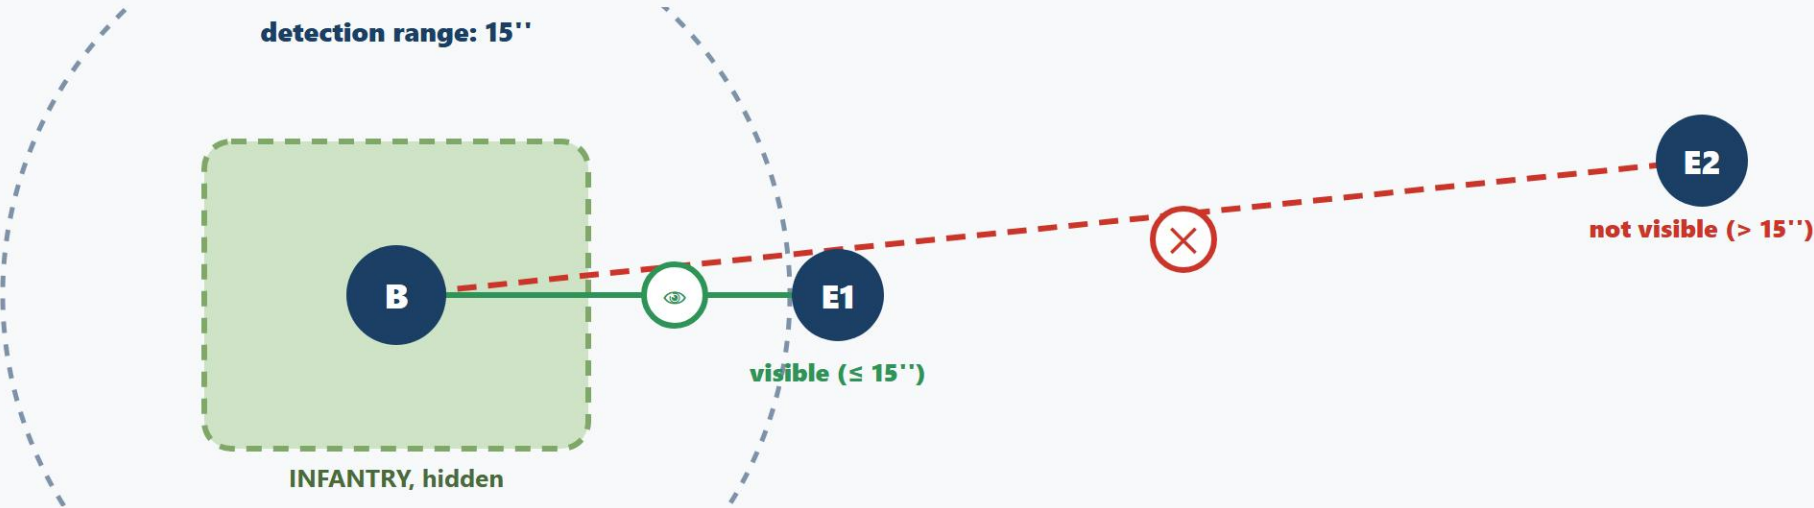

■ Obscuring Terrain

A terrain area containing one or more **light** or **dense** terrain features is an obscuring terrain area. If **every** line of sight drawn between two models crosses such an area — excluding areas either model is within — they are **not visible** to each other.

▲ Hidden

A model with the **INFANTRY/BEASTS/SWARM** keyword within a terrain area that contains dense terrain features is **hidden**, provided its unit did not make ranged attacks this turn or the previous turn: it is then only visible to enemy models within **15"** (its detection range).

🎯 Gone to Ground

If a **hidden** model is also **not fully visible** to the attacker due to one or more intervening **dense** terrain features, it has **gone to ground**: its detection range drops to **12"** (instead of 15") against that attack.

A unit that made one or more ranged attacks this turn or the previous turn can **never** go to ground, even if an ability lets it shoot while remaining hidden.

Warhammer 40,000

Decision Tree: Can I Declare a Charge?

Eligibility • Charge Roll • Charge Targets • Charge Move

Follow this tree during your Charge phase, for each friendly unit not yet selected to charge.

◆ Charge Target

By selecting one or more enemy units before moving — within 12" of your unit and within the maximum distance — they become **charge targets**.

▲ Fights First

If your unit makes a charge move, until the end of the turn, every model in your unit has the **Fights First** ability in the Fight phase.

1 Is your unit eligible to declare a charge?

Yes

No

✗ Cannot charge

2 Is there an enemy unit within 12"?

Yes

No

✗ Cannot charge

Charge roll: roll 2D6, the result is the maximum distance for the charge move*. Select your charge targets (see box) from the enemy units within range.

⚠ Failed Charge

Without modifiers, a charge roll result of **2** (double 1) **never** allows a charge move: a unit cannot be within engagement range (2") when attempting a charge.

3 Can you end engaged with all of your charge targets?

Yes

No

✓ Charge move made **

✗ No charge move made

* Each model must end closer to a charge target, within 1" of a charge target if possible, and engaged with a charge target if possible.

** The charge is still resolved even without a move (the unit has declared a charge this phase); see the Fights First box if the move did take place.

Warhammer 40,000

Decision Tree: Which Move Should I Make?

Stationary • Normal • Advance • Fall Back

In the Movement phase, every unit must be selected to make a move type, even to remain stationary.

1 Is your unit engaged with the enemy?

Yes

No

Remain Stationary

Max distance: —

Eligible if: any unit.

Effect: no models are moved.

Normal Move

Max distance: your unit's M characteristic.

Eligible if: unengaged unit.

After: must be unengaged.

Advance Move

Max distance: advance roll (D6) + M.

Eligible if: unengaged unit.

Before: make an advance roll (D6).

After: unengaged; until the end of the turn, not eligible to declare a charge or start an action, and can only shoot with [ASSAULT] weapons.

2 Is your unit battle-shocked?

Yes

No

MANDATORY

Desperate Escape

Max distance: your unit's M characteristic.

Eligible if: engaged unit.

Before: make 1 hazard roll for each model in the unit.

While moving: each model can be moved through enemy models.

After: unengaged; not eligible to shoot, declare a charge or start an action; make a battle-shock roll if it was not already battle-shocked.

Remain Stationary

Max distance: —

Eligible if: any unit.

Effect: no models are moved.

OPTIONAL

Ordered Retreat

Max distance: your unit's M characteristic.

Eligible if: engaged and not battle-shocked.

After: unengaged; until the end of the turn, not eligible to shoot, declare a charge or start an action.
