

Attack Sequence

Hit • Defense • Wounds • Panic

Resolve this sequence whenever a unit makes a Melee or Ranged Attack against an enemy.

1 Hit Rolls

1 D6 per Attack die

Unmodified roll of 1

MISS

Unmodified roll of 6 (always)

HIT

Roll ≥ the unit's To Hit Value

HIT

Any other result

MISS

2 Defense Rolls

1 D6 per Hit suffered, rolled by the defender

Unmodified roll of 1

FAIL (not blocked)

Unmodified roll of 6 (always)

BLOCKED

Roll ≥ Defense Stat

BLOCKED

Any other result

FAIL (not blocked)

3 Wounds

- 1 Each **unblocked Hit** deals 1 Wound to the defender.
- 2 Unless stated otherwise, each Wound removes **1 model** from the unit, always from the **last remaining rank**, starting from the right. A rank is only lost once its last model is removed.

4 Panic Test

2D6, rolled by the defender

The defender **suffered no Wounds** from this attack

PASSED (automatic)

2D6 total ≥ Morale Stat

PASSED

2D6 total < Morale Stat

FAILED

On a failure, the unit suffers **1D3 additional Wounds** (the D3 result), with **no Defense Save allowed**. Even when automatically passed, the test still counts as having been taken — effects that trigger from it remain active.

Combat Bonuses

CHARGE BONUS
Melee Attack following a Charge: re-roll any attack dice of your choice.

FLANK BONUS

Can I Declare a Charge?

Eligibility • Valid Target • Charge Distance • Alignment

Follow this tree when activating a unit, to determine if it can declare and succeed at a Charge.

Valid Target

It must be in **Line of Sight**, within **reachable distance** (Speed + 6" at worst), and the attacker must be able to align **at least 50%** of its tray to the target's, without being obstructed.

Charge Bonus

If the Charge is **Successful** (and not Disorderly), the following Melee Attack lets you **re-roll any attack dice** of your choice.

Disorderly Charge

If the Charge Distance die rolls a **1**, the Charge is Disorderly even if Successful: **no Charge Bonus**, and no Tactics cards may be played for the rest of the turn.

* A unit may never declare a Charge it cannot potentially complete (distance to target ≤ Speed + 6").

** Align the attacker at 50% or 100% with the target, then resolve 1 Melee Attack against it (see Charge Bonus box, and Disorderly Charge if the die rolled a 1).

*** The attacker makes a Panic Test (see Attack Sequence) and its activation ends immediately.

Cards, Orders & Priority

One per Trigger • Simultaneous Actions • Turn Player • Re-Rolls

Three independent priority rules — each applies in its own situation, they are not steps to chain together.

◆ One Effect per Trigger

If you have several Tactics cards and/or Order Abilities sharing the **same trigger** (e.g. "When a friendly unit attacks"), you may only use **one of them** each time that trigger occurs.

EXAMPLE

A player has both a Tactics card and an Order Ability that trigger "when a friendly unit attacks." When their unit attacks, they may only activate one of the two.

▲ Simultaneous Actions: who triggers first?

When several effects could trigger at the same moment, the situation determines what happens:

CASE 1 — THE EFFECTS BELONG TO THE SAME PLAYER

That player freely chooses the order in which they resolve.

CASE 2 — THE EFFECTS BELONG TO DIFFERENT PLAYERS

- 1 The **player whose turn it is** announces first whether they trigger one of theirs.
- 2 If they **decline**, their opponent may then trigger theirs. Once they have passed, the turn player cannot go back and respond.
- 3 Once both players have declared their effects, they are **resolved one at a time**, starting with an effect from the player whose turn it is.

• Re-Rolls

The same die may only be re-rolled (or forced to be re-rolled) **once per player**.

If both players have an effect that would re-roll the same die, the **player whose turn it is** triggers and applies theirs first. Their opponent may then use their own effect to force another re-roll.

Previous results from a re-rolled die are **discarded**: only the final result counts.

Terrain: Keywords & Examples

11 Keywords · Terrain Examples

Each Terrain piece has its own keywords that define its rules.

Unless it has the **Impassable** keyword, a unit may end a move on top of a Terrain piece. If its shape prevents this, remove it from the table (noting its position) until the unit has moved far enough away.

TERRAIN KEYWORDS

BLOCKS LINE OF SIGHT Line of Sight may not be traced through this Terrain piece by units not inside it.	COVER When tracing LoS for Ranged Attacks, it may not be traced through this terrain piece by units not inside it.	DANGEROUS Units performing Actions while in this piece, or moving into it, suffer D3+1 Wounds (only once during a Charge).
DESTRUCTIBLE While within 1" of this Terrain piece, units may perform a Melee Attack targeting it to automatically remove it from play.	ROUGH Units moving into, out of, or through this Terrain piece subtract 1" from the total distance they would move.	ELEVATED Units on this Terrain piece may ignore intervening units and Terrain when making Ranged Attacks.
HINDERING If the Attacker moved through or ended on this Terrain piece during a Charge, they do not gain their Charge Bonus.	FORTIFIED If the Attacker moved through or ended on this Terrain piece during a Charge, the defender gains +1 to their Defense Dice Rolls.	IMPASSABLE Units may pivot over, but otherwise never move into, through, or end overlapping, this Terrain piece.
INSPIRING While within Short Range of this Terrain piece, units gain +1 to Morale Test rolls.	HORRIFIC While within Short Range of this Terrain piece, units suffer -1 to Morale Test rolls.	

TERRAIN EXAMPLES

Hedge	Cover Destructible Rough
Forest	Cover Fortified
Weirwood Tree	Inspiring
Corpse Pile	Hindering Horrific
Palisade	Blocks Line of Sight Destructible Impassable
Bog	Hindering Rough
Stakes	Dangerous Destructible
Low Wall / Ruined Wall	Destructible Fortified Hindering

This Rulebook only details the most common Terrain pieces. For any other piece, agree with your opponent on which keywords apply.
